Patient Name: Daniel Adebayo

Date of Birth: 14 March 1998

Gender: Male

Patient ID: LCSC-20481

Consultation Date: 11 May 2026

Attending Physician: Dr. Miriam Okafor

Department: Internal Medicine

Chief Complaint

Patient reports persistent headaches, fatigue, and occasional dizziness over the past 3 weeks.

Medical History

- Mild hypertension diagnosed in 2024
- No known drug allergies
- Non-smoker
- Occasional alcohol use

Vital Signs

- Blood Pressure: 148/92 mmHg
- Heart Rate: 84 bpm
- Temperature: 36.8°C
- Respiratory Rate: 16 breaths/min
- Oxygen Saturation: 98%

Examination Findings

Patient appears alert and oriented. Mild fatigue observed. Cardiovascular examination normal. No chest pain reported. Neurological examination unremarkable.

Assessment

- Stage 1 Hypertension

- Tension Headaches
- Possible stress-related fatigue

Plan

1. Begin antihypertensive medication.
2. Reduce sodium intake.
3. Increase hydration and sleep.
4. Follow-up appointment in 4 weeks.
5. Blood tests requested:
 - Full Blood Count (FBC)
 - Lipid Profile
 - Fasting Blood Sugar

Physician Notes

Patient advised to monitor blood pressure at home twice daily and report persistent dizziness immediately.
